F.2 STEM Education Tour

Our school successfully organized a study tour to Shenzhen on 18 April. This tour is part of a STEM Project curriculum which provides another valuable opportunity for students to experience how STEM knowledge can be transformed into latest products.

F.2 STEM Education Tour

About 130 F.2 students participated in the trip. The students first visited the showroom of 3NOD Technology Co. Ltd. and learned how the company provides OPM (Original Planning Manufacture) in electronic devices of different brands, as well as their development in smart home devices.

Then they visited Mannay-HKUST Cosmetic Innovation R&D Centre, which is operated under HKUST Shenzhen Research Institute. Students gained knowledge of the research done on Chinese herbs that can be applied to the development of new cosmetic products. Finally, through the visit to Shenzhen Industrial Exhibition Hall, students experienced the latest achievements by different Shenzhen industries.

This trip gave the students some insights into how STEM education can be connected and applied in our society.
