## DIALOGUE WITH CEOS AND ENTREPRENEURS

— MR. BENSON TAM

### 20th NOVEMBER 2020

We were thrilled to have Mr. Benson Tam as our guest of the *Dialogue with CEOs and Entrepreneurs*, where he shared with us his personal growth and recent business project about development of AI city in Hangzhou. Engaged in a fruitful and interactive discussion with Mr. Tam on the topic of digital cities in mainland China, students were inspired to make further queries regarding the future technological development, essential skills for the workplace of tomorrow, and start-up ideas in the digital era.

“Nowadays, the technological breakthrough is like five years per generation,” said Mr. Tam. His words encourage us to keep pace with the fast-moving and ever-changing digital world. We look forward to the next dialogue with CEOs and entrepreneurs.
